

## **SENSAR** UAV

Big Bruce Racing Products [www.bigbruceracing.com](http://www.bigbruceracing.com) is proud to present **SENSAR** UAV.

BBRP has acquired manufacturing rights for this unique and versatile UAV platform.

BBRP's long established impeccable reputation for quality composite aircraft design construction and performance, has combined with an operational highly experienced and professional UAS airframe engineering capability to produce this superior UAV platform.

**SENSAR** UAV's extraordinarily high performance and versatility is due to the optimized

aero-structural, volumetric and propulsion layout. **SENSAR**'s conventional high performance aerodynamics are complimented by a huge payload volume and payload mass capability.

**SENSAR** UAV is available in 4 main variants. The number of engines, and engine location is completely variable to suit a huge range of mission and performance requirements in a compact lightweight structure.

Multi Engine tractor-pusher, Twin Engine pusher, Twin Engine Tractor, Single Engine Tractor

Specifications:

TOW	Wing Span	Length	Stall Speed	VNE
Min: 20kg Max: 50kg	4m	2.4m	18kt	180kt
